MONTHLY SUMMARY OF COMMERCE AND FINANCE OF THE UNITED STATES

APRIL, 1909

WASHINGTON

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States,

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

APRIL SUMMARY OF INTERNAL-TRADE MOVEMENTS.

The summary of Internal Commerce for April, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the four months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and, X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

The American Railway Association reports the total number of idle cars within the country at the end of the month as 270,574, compared with 396,139 on April 29, 1908, when the largest number of idle cars was reported since the late depression began. A slight increase in the number of surplus cars appears under date of May 12, when the number of idle cars is given as 271,321 in the United States proper. For the fortnight the number of idle coal, gondola, and hopper cars shows a decrease of 5,001. During the same time the idle box cars increased 5,220 in number.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for April and four months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for April and four months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the Bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets such as Duluth, Minneapolis, Little Rock, and Louisville make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of April and four months ending with April. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of April transactions at 97 ports of receipt and 126 ports of shipment were reported. The number of vessels arriving in April was 2,937 and the departures numbered 3,230 vessels. The registered tonnage for the month was as follows: Arrivals, 2,451,121 net tons; departures, 2,975,019 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, APRIL AND FOUR MONTHS ENDING APRIL, 1907–1909.

A summary of the lake traffic for April, compared with the corresponding months in 1907 and 1908, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. April receipts in 1909 at all ports reporting were 863,106 net tons, compared with 508,198 net tons in April, 1908, and 2,486,248 net tons in April, 1907. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coast are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During April vessels were supplied with fuel at these five ports to the amount of 1,241,092 tons.

DOMESTIC SHIPMENTS[a] OF COAL BY WATER FROM FIVE ATLANTIC PORTS, APRIL AND FOUR MONTHS, 1908 AND 1909.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

Domestic Receipts of Merchandise at San Francisco, Cal., April and Four Months ending April, 1908 and 1909.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 97,621 net tons mined in the first and second pools during April, makes a total coal traffic of 933,101 net tons for the river during April. Of other downstream freight, 32,554 tons of miscellaneous merchandise are to be added, making a total of 965,655 net tons in April. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For four months ending with April the total movement was 3,898,297 net tons in 1909, 3,139,436 net tons in 1908, and 3,804,840 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in April amounted to 103,490 net tons.

The total freight moved in both directions, on this basis of calculation, was 1,069,145 net tons in April, 1909, as against 416,083 net tons in April, 1908, and 1,185,555 net tons in April, 1907.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the four months ending April 30, 1909, of the vessels reported 1,395 were loaded with coal; 232 carried lumber, logs, piling, and wood; 53 carried ties; 183 carried merchandise; 37, rocks; 7, brick; 16, steel; 1, iron rails; and 7, wire and nails.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No. 11. SERIES 1908-1909

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

MAY, 1909

WASHINGTON
GOVERNMENT PRINTING OFFICE
1909

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term *"entry for consumption"* is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States,

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

MAY SUMMARY OF INTERNAL-TRADE MOVEMENTS.

The summary of Internal Commerce for May, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the five months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and, VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and, X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for May and five months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for May and five months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the Bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets such as Duluth, Minneapolis, Little Rock, and Louisville make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

That class of tonnage which required the use of the Great Lakes as a link in its journey in May consisted of the following: Receipts at Ashtabula, 18 net tons unclassed freight; Chicago-South Chicago, 6,790 net tons unclassed freight; Conneaut, 45 net tons flour and 21 net tons unclassed freight; Gladstone, 1,582 net tons unclassed freight, and Milwaukee 1,650 net tons unclassed freight. Shipments from Ashtabula, 720 bushels corn; Chicago-South Chicago, 112 net tons flour, 400,907 bushels corn, and 734 net tons unclassed freight; Conneaut, 1,360 net tons soft coal, and Gladstone, 60 bushels wheat, 4,994 net tons flour, and 1,870 net tons unclassed freight.

The total "in-transit" movement for May was 1,360 net tons soft coal, 5,151 net tons flour, 60 bushels wheat, 401,627 bushels corn, and 12,665 net tons unclassed freight.

During May, 1909, there were inspected to vessels at Chicago, as reported by the municipal grain inspector, 3,048,320 bushels of grain, composed of 590,933 bushels wheat, 1,948,140 bushels corn, 489,247 bushels oats, and 20,000 bushels rye. IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coast are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The total amount of bunker or fuel coal supplied at these five ports to vessels in the domestic and foreign trade during the month of May was 716,620 tons.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years, to the end of May. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to May 31, 1907–1909.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 76,376 net tons mined in the first and second pools during May, makes a total coal traffic of 983,656 net tons for the river during May. Of other downstream freight, 21,943 tons of miscellaneous merchandise are to be added, making a total of 1,005,599 net tons in May. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For five months ending with May the total movement was 5,053,811 net tons in 1909, 4,290,429 net tons in 1908, and 4,946,913 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in May amounted to 149,915 net tons.

The total freight moved in both directions, on this basis of calculation, was 1,155,514 net tons in May, 1909, as against 1,150,993 net tons in May, 1908, and 1,142,073 net tons in May, 1907.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the five months ending May 31, 1909, of the vessels reported 1,651 were loaded with coal; 259 carried lumber, logs, piling, and wood; 67 carried ties; 229 carried merchandise; 37, rocks; 9, brick; 19, steel; 1, iron rails; 4, staves; and 15, wire and nails.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railway, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

JUNE, 1909

WASHINGTON
GOVERNMENT PRINTING OFFICE

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General Imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

The reports of this Bureau are supplied to applicants without expense so long as the editions allowed for distribution will permit, upon application to "Chief of the Bureau of Statistics, Department of Commerce and Labor, Washington, D. C.," and can be purchased at a small price by application to the "Superintendent of Documents, Office of Public Printer, Washington, D. C."

As the demand on the part of the public for the reports of the Bureau is beyond its ability to supply, persons to whom they are regularly sent having no further use for them are requested to notify this Bureau of their willingness to dispense with them. The Bureau will be glad to receive such copies of its publications as have been sent to parties who do not care to retain them, and upon receipt of notice of willingness to return such copies franked mailing slips will be forwarded for that purpose; but one frank is required for each package, which may contain several copies, if the package does not exceed 4 pounds in weight. *Notify the Bureau promptly of change of address.*

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

JUNE SUMMARY OF INTERNAL-TRADE MOVEMENTS.

The summary of Internal Commerce for June, 1909, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the six months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commerical movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and, VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and, X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for June and six months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for June and six months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENT AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the Bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities all quantities forwarded or rebilled even if not unloaded, and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table **September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.**

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of June and six months ending with June. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of June transactions at 147 ports of receipt and 207 ports of shipment were reported. The number of vessels arriving in June was 8,957 and the departures numbered 9,049 vessels. The registered tonnage for the month was as follows: Arrivals, 12,492,866 net tons; departures, 12,811,195 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JUNE AND SIX MONTHS ENDING JUNE, 1907-1909.

A summary of the lake traffic for June, compared with the corresponding months in 1907 and 1908, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. June receipts in 1909, at all ports reporting, were 9,496,348 net tons, compared with 6,319,139 net tons in June, 1908, and 11,362,829 net tons in June, 1907. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coast are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During June vessels were supplied with fuel at these five ports to the amount of 338,143 tons.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years, to the end of June. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

Arrivals of Redwood, Pine, and Fir at California Points for Periods Specified, 1907–1909.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 35,092 net tons mined in the first and second pools during June, makes a total coal traffic of 785,092 net tons for the river during June. Of other downstream freight, 18,754 tons of miscellaneous merchandise are to be added, making a total of 803,846 net tons in June. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For six months ending with June the total movement was 5,997,703 net tons in 1909, 5,130,077 net tons in 1908, and 5,966,581 net tons in 1907. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in June amounted to 140,046 net tons.

The total freight moved in both directions, on this basis of calculation, was 943,892 net tons in June, 1909, as against 839,648 net tons in June, 1908, and 1,019,668 net tons in June, 1907.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the six months ending June 30, 1909, of the vessels reported 1,870 were loaded with coal; 287 carried lumber, logs, piling, and wood; 78 carried ties; 296 carried merchandise; 41, rocks; 9, brick; 19, steel; 1, iron rails; 4, staves; 15, wire and nails; 2, cotton ties; and 1, drainpipe.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of June, 1909.
